HOW TO IMPROVE PERFORMANCE

- Use appropriate billing code because it allows us to give credit for the measure without asking you or your team to review the record.
- Ensure that medical records include all components listed above for a comprehensive well-child visit.
- Convert sick visits and daycare physicals in to well-child visits by performing and submitting the appropriate codes for a well-child visit. You can then bill a well-child with a modifier for the sick visit or daycare physical.
- Use a standardized template that meets the counseling requirements for the well-child visit.
- Train office staff to review EHR prior to visit to identify if a well-child visit is upcoming or overdue.
- Use EHR tools to send patients/parents electronic reminders of the need for well-child visits.
