

Title:	COVID-19 Temporary Visitation Policy				
Version:	16	Approved:	Committee - Quality Improvement Committee of the Board, Brandon Bredimus (VP CNO)	Date:	03/18/2022

Update effective

Based on the new guidance of the Centers for Disease Control and Prevention (CDC), Midland Memorial Hospital (MMH) shall limit visitors allowed in the facility to the extent the hospital determines such limitation is necessary or required by state and/or federal regulations to prevent or control a COVID-19-related health and safety risk. MMH will implement the following visitation rules based on confirmed positive COVID cases in house and continued community disease activity:

Visiting Hours:

- Visiting hours for inpatient areas will be from 8am to 8pm every day, including weekends. One patient support person may remain overnight.

COVID Patients:

- Patients on our COVID designated units or with a confirmed COVID diagnosis will be allowed 1 support person* who does not have a current SARS-CoV-2 infection and is not currently experiencing illness symptoms (fever/chills, cough, shortness of breath, new loss of taste or smell, sore throat or headache). Only 1 support person will be allowed to visit per day and only during regular visiting hours. A support person visiting a COVID patient will be required to wear full personal protective equipment (PPE) while in the room and will not be allowed to re-enter the room once they exit. Approvals for exemptions should be directed to the Clinical Manager of the unit.

Non-COVID Patients:

- Patients on our Critical Care Unit (ICU/CCU), Mother-Baby, and Medical-Surgical (Med-Surg) units will be allowed 2 identified support persons* during the visiting hours. Only 2 support persons* at a time in the room.
 - One patient support person may remain overnight. All other visitors must exit the building at 8pm.
- Patients in the Emergency Department will be allowed 2 support persons* for the duration of their stay in the ED. If the patient is admitted, they would fall under the inpatient visitation guidance of the unit they will be admitted to.
- Outpatient services will be allowed 2 support persons*. With the exception of Endoscopy and Outpatient Testing Center, due to limited space in their waiting areas, where 1 support person* will be allowed.
- Mothers on the Labor and Delivery unit will be allowed 1 support person* and 1 additional coach/partner for no more than 2 persons at one time during the birthing process. Doula would be considered a coach and would count towards the 2-person maximum.
- Pediatric patients will be allowed 2 parents or guardians for no more than 2 persons at one time. 2 parents/guardians may stay with the patient at all times, including overnight.
- NICU limited visitation will follow the most current guidelines as determined by the unit.

Printed documents may not represent the current approved version.

Other Guidelines Related to Visitation of COVID and Non-COVID Patients:

- The only points of entry to the hospital for patients and support persons* will be the Emergency Department entrance and Main Entrance. The Main hospital entrance will be open from 5am to 8pm, Monday – Friday, for all outpatient services. Visitation will begin at 8am. The ED entrance will remain open 24/7 but should only be used for ED patients and their support persons* while the Main Entrance is open. No support persons* or patients will be allowed to enter the building through badged employee entrances.
- The Craddick Medical Office Building entrance will be open for patients and support persons* utilizing services in this building but will not be able to enter the hospital through this entrance and will need to proceed to the main or ED entrance for screening.
- Every support person* who enters the facility will be screened using the CDC questions listed in the screening process at entrances to the facility. No one who has a current SARS-CoV-2 infection and/or is currently experiencing illness symptoms (fever/chills, cough, shortness of breath, new loss of taste or smell, sore throat or headache) will be permitted to visit any patient.
- Support persons* who do not have a current SARS-CoV-2 infection and/or are not currently experiencing illness symptoms (fever/chills, cough, shortness of breath, new loss of taste or smell, sore throat or headache) but have had prolonged close contact defined as within 6 feet of an infected person for a cumulative total of 15 minutes or more over a 24-hours period, with someone with SARS-CoV-2 infection in the prior 14 days, will be able to visit a patient being treated for a known SARS-Cov-2 infection.
- All support persons* coming to the hospital will be screened and need to have a well-fitting surgical face mask. Everyone in the hospital should have a mask on, including staff, patients, and visitors. Support persons* will be required to wear a mask at all times while in the building (including the patient’s room), perform frequent hand hygiene, should physically distance (maintaining at least 6 feet between people), and restrict their visit to only the patient’s room as much as possible.
- The patient will be required to wear a mask covering their nose and mouth during the time that the support person* is in their patient room. If a patient’s medical condition precludes them from being able to wear a mask, the support person* should maintain physical distancing when possible.
- Any support person* refusing to or unable to wear a mask will not be permitted in the building or will be required to leave if already in the building.
- Any medically able patient refusing to wear a mask when their support person* is present will lose their visiting privileges.
- Support persons* not visiting a COVID patient may leave the patient room to get food/refreshments as needed from the Market or Giftshop but should limit this as much as possible. Non-COVID Support persons* may also leave the building as needed, but it is strongly encouraged to limit travel as much as possible to lower the risk of disease transmission. After visiting hours, the support person will not be able to re-enter the building.
- The main lobby will be open for waiting but lobbies on each floor will be closed. Large gatherings of people outside of the building will also be discouraged.
- Changing of support persons* will be done only in the main lobby. Switching will not be allowed on the units.
- No children or person under 16 years of age will be permitted at any Midland Health facilities, unless they are here to receive medical treatment or have been emancipated as an adult and are

here in a parental/spousal capacity. Extenuating circumstances can be discussed with the Clinical Manager of the unit.

***Support Person is a family member, friend, or other individual who is at the hospital to visit/support the patient during the patient’s stay.**

Exemptions may be revoked at any time and without notice based on current hospital conditions. Visitor restrictions will be evaluated frequently and updated accordingly.
